

# UMA DEVI M

✉ umadevim.23ai@gmail.com    LinkedIn    GitHub    LeetCode: UmaDeviM

## Objective

---

I am interested in continuously growing my skills and contributing to an organization that actively encourages innovation, creativity, and forward-thinking solutions.

## Education

---

### Kongu Engineering College

B.Tech Artificial Intelligence and Machine Learning - CGPA 9.02\* (2023–2027)

### Joy Matric Higher Secondary School

HSC – 91.8% (2023)

## Programming Languages

---

- C
- Java
- Python
- JavaScript

## Technical Expertise

---

### Web Development:

- HTML • React • NodeJS
- ExpressJS

### Technologies:

- Git/GitHub • Machine Learning
- Power BI

### Database:

- MySQL • MongoDB

## Achievements

---

- **Best Presentation and Team Collaboration – BYTS India Hackathon**  
Developed an AI web app for smart learning and visual math insights.
- **3rd Prize – IBM GenAI Hackathon**  
Built an AI system for legal document analysis using NLP techniques.
- **3rd Prize – Kaggle Clash, KEC**  
Built and assessed ML models, delivering improved accuracy.
- **Academic Excellence Award (2023–2024)** – Ranked in the Top 1% of the AIML department.

## Projects

---

### CODATS — Code Analysis and Threat Scanning System

- Developed a multi-language vulnerability analysis system with inline detection, contextual insights, and fix recommendations.
- Integrated the solution as a VS Code extension to deliver real-time security feedback within the coding workflow.

### SplitEase — Group Expense Tracking and Settlement System

- Built a full-stack expense management platform with secure authentication and contribution-based splitting.
- Implemented automated balance tracking and settlement workflows for streamlined group expense handling.

### StarRAG Bot — Intelligent Information Retrieval System

- Built a multimodal RAG system enabling conversational access to information across diverse document formats.
- Achieved context-aware responses through intelligent indexing and language-driven retrieval.

### ClauseWise — Legal Document Analysis System

- Created a system to extract, organize, and summarize complex legal documents.
- Minimized manual review using automated language understanding and classification methods.

### VisualMath — Interactive Learning Platform

- Developed an interactive math learning platform with intelligent input handling and visual problem representation.
- Enhanced learning through conversational guidance and structured problem-solving support.

## Area of Interest

---

- Full-Stack Development
- Machine Learning
- Object-Oriented Programming (OOP)

## Certifications

---

- MongoDB Associate Developer – MongoDB University, 2025
- Getting Started with Deep Learning – NVIDIA, 2025
